

Problem Statement: **Un-Availability of Potable Water to large section of People due to lack of Water Quality Monitoring System**

Solution: AquaSense is **Wireless Sensor Network (WSN) System** that continuously monitor **Quality Parameters of the Water** and raises **Alerts in case of Violation of Norms** to ensure **Safe Potable Water for the large section of People.**

Technology

WAQMAPP

Water Quality Monitoring System

Product

Features

- Low Cost
- Low Power
- App based
- Alarm generation
- Intelligent
- Adaptive
- Scalable design to add/ remove more sensors
